

NORWICH City Council

Committee name: Cabinet

Committee date: 10/09/2025

Report title: Corporate Performance Report for Quarter 1, 2025-2026

Portfolio: Councillor Stonard, Leader of the Council

Report from: Executive director of communities and housing

Wards: All wards

OPEN PUBLIC ITEM

Purpose

To report on progress against the delivery of the corporate plan priorities and key performance indicators for quarter one of 2025-2026.

Recommendation:

It is recommended that cabinet review progress on the key performance indicators for this quarter.

Policy framework

The Council has five corporate priorities, which are:

- An open and modern Council.
- A prosperous Norwich.
- A fairer Norwich.
- A climate responsive Norwich.
- A future-proof Norwich.

This report meets the 'An open and modern council' corporate priority.

Report details

Introduction

1. For the reporting period 2025-2026, information across corporate performance, finance and risk elements will be presented to Cabinet as three quarterly reports, and an annual report for 2025-2026.
2. The KPIs in this report have been carried over from the previous Corporate Plan and are under review, as part of the new business planning process. For the purpose of this report, the existing KPIs have been mapped to the new priorities in the Community-led Plan 2024-2029 'We are Norwich':
 - An open and modern council
 - A prosperous Norwich
 - A fairer Norwich
 - A climate responsive Norwich
 - A future-proof Norwich
3. This report sets out progress for the period 01 April – 30 June 2025.
4. Performance reporting for indicators in this report is based around a traffic light system, for further information please see [here](#).

Overview of Performance Measures for Quarter 1 2025-2026

5. There are 20 quarterly KPIs reported for this period, and data for one KPI is awaiting external validation and will be reported in quarter two 2025-2026. The table below compares the latest quarterly performance with a rolling 12-month average, broken down by status:

KPIs against targets		Rolling 12-month average		Q1 totals 2025-2026	
Green	Performance is on or above target	13	62%	13	68%
Amber	Early warning that performance is not on target and action may be required.	4	19%	2	11%
Red	Performance has reached a level where we will intervene and agree what action is required to bring it back on target.	4	19%	4	21%
Totals		21		19	

6. The totals for the 'Rolling 12-month average' slightly differ from the KPI count of quarter one 2025-2026. This is because of the following reasons:
 - **Removal:** The KPI '*Council on track to remain within General Fund Budget*' has been removed from the totals for quarter one 2025-2026.
 - **Pending verification:** The KPI '*% household waste sent for reuse, recycling, composting (reporting on previous quarter)*' is awaiting verification and will be reported in quarter two of 2025-2026.
7. Please note, KPI11a and KPI11b which measure the percentage of residents who feel safe in their local area during the day and night have been removed. These indicators can be influenced by external agencies, not just the activity of the council, which limits the council's ability to directly impact them. Instead, an overview of wider community safety issues including a range of data relating to community safety will be considered as part of the Community Safety Partnership's annual review. This annual review forms part of the Scrutiny work programme and will be considered by Scrutiny Committee later this year.
8. Overall, performance remains steady with positive movement across a majority of indicators. There are four KPIs that have reached a level where we are taking action to bring them back on target.
9. The information below provides an overview of the following:
 - KPIs off target and have reached a level where we will intervene.
 - KPIs not on target and action may be required to improve performance
 - KPIs where there have been significant improvements during the quarter.

KPIs off target requiring intervention

KPI Title & Number	Q1 2024/2025	Q2 2024/2025	Q3 2024/2025	Q4 2024/2025	Q1 2025/2026
KPI01					
Average number of days taken to process new Housing Benefit claims from point of receipt to notification of entitlement	20.00	15.00	18.00	21.00	22.60
KPI05					
% of council housing rent collected (excluding arrears brought forward)	97.50	97.33	99.77	99.47	96.88

- Average number of days taken to process new Housing Benefit claims from point of receipt to notification of entitlement:** In quarter one, the average Speed of Processing (SoP) for new Housing Benefit (HB) claims was 22.6 days across 351 claims – above the revised target of 21 days. This reflects the increasing complexity of remaining caseloads following the migration of Housing Benefit to Universal Credit. This shift has resulted in more time-intensive casework and increased volumes of data from the Department for Work and Pensions (DWP) relating to HB and Council Tax Reduction claimants. We are also experiencing delays in receiving necessary data from housing providers, which is contributing to longer processing times. Measures will be introduced to address these issues. Nationally, England's average SoP across quarter one to quarter three of fiscal year ending 2025 was 21 days, supporting the rationale for adjusting the local target from 19.5 to 21 days. The service is actively addressing these pressures by focusing team efforts on clearing older new claims to improve performance in coming months.
- % of council housing rent collected (excluding arrears brought forward):** Cash collection in quarter one dropped compared to 2024-2025, mainly due to the rise in Universal Credit (UC) claimants—now 55% of tenants. This shift reduced Housing Benefit payments by £1.5 million, with UC managed payments leaving a £110,000 gap. Delays in UC payments and regulatory changes are driving persistent arrears. Staff are spending more time on complex arrears cases and DWP rent verifications. Rising living costs are worsening tenant finances. A new dashboard will be piloted to prioritise urgent cases, with legal action expected to increase.

KPIs off target requiring intervention

KPIs to watch for quarter one

KPI Title & Number	Q1 2024/2025	Q2 2024/2025	Q3 2024/2025	Q4 2024/2025	Q1 2025/2026
KPI06					
Average re-let time of council homes in calendar days (excluding major works)	79.00	67.00	51.00	43.00	59.00
KPI22					
Total number of private sector insulation measures completed (council measure, dependent on external funding)	0.00	0.00	0.00	0.00	0.00

- **Average re-let time of council homes in calendar days (excluding major works):** This quarter has increased from quarter four (43), largely due to the continued increasing volume of repairs required in minor works voids which is extending the repair duration close to the levels of major works voids. There have also been delays at the end of the void process with outstanding planned delivery works and also with a new cleaning contractor that have been challenged with resourcing and completing work in a timely manner. We are confident that, through ongoing discussions with the contractor, these issues will be resolved, and performance will improve.

Furthermore, Housemark benchmarking data indicates that the average across the sector is 55 days. This suggests that our current target of 21 days is no longer aligned with sector norms. In response, we are conducting a peer review of other councils to help establish a more realistic and appropriate target, ensuring our performance expectations are in line with those of comparable authorities.

- **Total number of private sector insulation measures completed (council measure, dependent on external funding):** This figure is at zero for quarter one 2025-2026 pending commencement of delivery for the Warm Homes: Local Grant. This grant funding totalling £4.7m will be used to deliver private sector energy efficiency and insulation measures to an estimated 330 private sector homes over the three-year period to March 2028, with delivery set to commence imminently in quarter two 2025-2026.

KPIs not on target and where action may be required

KPIs to watch for quarter one

KPI Title & Number	Q1 2024/2025	Q2 2024/2025	Q3 2024/2025	Q4 2024/2025	Q1 2025/2026
☐ KPI07					
% of council homes with a valid gas safety certificate	99.99	100.00	100.00	100.00	99.95
☐ KPI15					
% of planning applications determined within statutory time limits	88.00	88.00	85.00	93.00	83.00

- **% of council homes with a valid gas safety certificate:** There was a temporary decline in performance during quarter one, primarily due to contractor personnel changes with new service personnel required to complete mandatory training. Additionally, there have been changes to court timeframes for warrant applications, which have restricted the numbers of homes we gain access to for Gas Servicing and in turn, contributed to the reduction in performance figures. Both issues have now been addressed as we enter quarter two, and we anticipate a return to better performance levels.
- **% of planning applications determined within statutory time limits:** 85 of 102 applications were determined in time. This figure remains well above the designation figure of 70% but could be improved. The team will look at the applications which went overtime to determine whether some improvements could be made to working practices.

KPIs not on target and where action may be required

KPI Title & Number	Q1 2024/2025	Q2 2024/2025	Q3 2024/2025	Q4 2024/2025	Q1 2025/2026
▲					
☐ KPI10					
% household waste sent for reuse, recycling, composting (reporting on previous quarter)	37.70	41.00	36.00	37.50	

This indicator has been flagged as one to watch. Although it reflects quarter four data, it is reported in quarter one following verification. It is not included in quarter one totals but is highlighted to show that action is underway to return to target.

- **% of household waste sent for reuse, recycling, composting (reporting on previous quarter):** Recycling performance in quarter four has slightly increased, with the status moving from 36% to 37.5%. Rates remain within the typical annual range of 36% to 41%, consistent with historical trends and the seasonal variations which impacts the tonnages of garden waste collected. To enhance recycling outcomes, the following actions are underway:
 - Expansion of the Food Waste Service to over 8,000 additional properties in 2026
 - Implementation of Simpler Recycling legislation
 - Investment in additional Environmental Services resources – Education and Enforcement
 - Development of targeted behaviour change campaigns, community education, and enforcement initiativesQuarter one data is currently unavailable (blue) due to delays in the Waste Data Flow validation process. Verified data for the quarter one period 2025-2026 will be published for quarter two, 2025–2026 reporting.

KPI Title & Number	Q1 2024/2025	Q2 2024/2025	Q3 2024/2025	Q4 2024/2025	Q1 2025/2026
KPI02					
Council Tax Collection – the amount of in year council tax plus arrears from old years collected (target set according to budget requirement)	105.08	103.17	101.98	101.87	104.05
KPI03					
Business Rates Collection – the amount of in year business rates plus arrears from old years collected (target set according to budget requirement)	100.36	99.43	99.97	100.23	111.24
KPI08					
Number of homeless households living in temporary accommodation	73.00	65.00	73.00	65.00	62.00

- Council Tax Collection – the amount of in year council tax plus arrears from old years collected (target set according to budget requirement):** Collection rate for the first quarter is ahead of target and focus continues to be directed on the recovery of arrears.
- Business Rates Collection – the amount of in year business rates plus arrears from old years collected (target set according to budget requirement):** The first quarter for business rates is ahead of target due to a large payment for a new warehouse and a backdated retail relief. There are also a number of accounts that pay the full year in April which front-loads income into the first quarter.
- Number of homeless households living in temporary accommodation:** The increase in temporary accommodation use over the past year reflects the increase in homelessness presentations being experienced by all local authorities. We continue to intensively manage use of temporary accommodation which remains low in comparison to other local authorities in the area, despite the higher level of homelessness presentations we experience. Meeting our target under these challenging circumstances is largely due to external funding, which has enabled us to allocate additional resources specifically to the prevention and relief of homelessness within this client group.

KPI Title & Number	Q1 2024/2025	Q2 2024/2025	Q3 2024/2025	Q4 2024/2025	Q1 2025/2026
KPI14					
% of planning decisions upheld after appeal (where council has won)	41.00	56.00	62.00	73.00	80.00
KPI24					
% of customer contact that takes place through digital channels	52.31	52.84	68.28	51.10	68.53
KPI25					
% of FOI requests responded to within statutory timescales	98.20	96.30	93.91	93.89	95.90

- **% of planning decisions upheld after appeal (where council has won):** Four out of five appeals were upheld in this period which is a good sign that the council's planning decisions remain robust and defensible.
- **% of customer contact that takes place through digital channels:** Target exceeded. There has been a higher demand for waste and refuse services because of customers accessing the bin checker due to the high number of bank holidays.
- **% of FOI requests responded to within statutory timescales:** Performance is above target and represents an improvement relative to the previous two quarters.

10. Please see [Appendix A](#) for a detailed overview of all performance data for quarter one with commentary of progress.
11. For a detailed list of each KPI, how it is calculated, how frequently it is reported and what the target and intervention levels are, please see Norwich City Council's [website](#).

Financial and resources

12. Any decision to reduce or increase resources or alternatively increase income must be made within the context of the council's stated priorities, as set out in its Corporate Plan 2024-2029, budget and medium-term financial strategy.
13. There are no proposals in this report that would reduce or increase resources.

Legal

14. In considering its financial and non-financial performance, the Cabinet is supporting the Council to fulfil its duties under s.151 of the Local Government Act 1972 to ensure there are arrangements in place for the proper administration of its financial affairs, and under s.3 of the Local Government Act 1999 to make arrangements to secure continuous improvement in the way its functions are exercised, having regard to a combination of economy, efficiency and effectiveness.

Statutory considerations

Consideration	Details of any implications and proposed measures to address:
Equality and Diversity	This report does not have direct implications for equality and diversity; it reports on progress made in delivering agreed services and programmes, the equality implications of which will have been considered as part of service planning or other decision-making processes.
Reducing Inequality Target Areas (RITAs)	This report does not have direct implications for RITAs; it provides an update on progress made in delivering agreed services and programmes, the implications of which will have been considered elsewhere.
Health, Social and Economic Impact	This report does not have direct health, social or economic implications; it provides an update on progress made in delivering agreed services and programmes, the implications of which will have been considered elsewhere.
Crime and Disorder	This report does not have direct implications for crime and disorder; it provides an update on progress made in delivering agreed services and programmes, the implications of which will have been considered elsewhere.

Consideration	Details of any implications and proposed measures to address:
Children and Adults Safeguarding	This report does not have direct safeguarding implications; it provides an update on progress made in delivering agreed services and programmes, the implications of which will have been considered elsewhere.
Environmental Impact	This report does not have direct environmental implications; it provides an update on progress made in delivering agreed services and programmes, the implications of which will have been considered elsewhere.

Risk management

Risk	Consequence	Controls required
Specific risk management activities and detailed consideration of the corporate risk register are reported separately through the quarterly Risk Management Report.	Failure to manage risks appropriately could have financial reputational or other consequences	Risk owners are required to implement controls to mitigate risks and update these regularly.

Other options considered

15. There are no alternative options to consider.

Reasons for the decision/recommendation

16. It is recommended that cabinet review progress on the key performance indicators for this quarter.

Appendices:

- **Appendix A** provides performance data for quarter one with commentary of progress.

% of council housing rent collected (excluding arrears brought forward)

- Q1 2024/2025
- Q2 2024/2025
- Q3 2024/2025
- Q4 2024/2025
- Q1 2025/2026

Latest commentary on performance:

Cash collection in quarter one dropped compared to 2024/25, mainly due to the rise in Universal Credit (UC) claimants—now 55% of tenants. This shift reduced Housing Benefit payments by £1.5 million, with UC managed payments leaving a £110,000 gap. Delays in UC payments and regulatory changes are driving persistent arrears. Staff are spending more time on complex arrears cases and DWP rent verifications. Rising living costs are worsening tenant finances. A new dashboard will be piloted to prioritise urgent cases, with legal action expected to increase.

Breakdown per quarter

KPI Title	Q1 2024/2025	Q2 2024/2025	Q3 2024/2025	Q4 2024/2025	Q1 2025/2026
% of council housing rent collected (excluding arrears brought forward)	97.50	97.33	99.77	99.47	96.88

Notes on methodology:

(A / B) *100. Where A = the actual rent and service charges collected year-to-date on current & former General Needs (GN) & Housing for Older People (HfOP) (excluding garages) and where B = the actual rent and service charges due year-to-date for all tenanted GN & HfOP properties (excluding garages). Worked example - By the end of September £470,000 of rent and service charges had been received by the organisation from current & former tenants. The year-to-date actual rent and service charges due is £500,000. Rent collected as a percentage of rent owed = (£470,000 / £500,000) *100 = 94.0%

KPI18

KPI19

% of households owed a homelessness prevention duty (in accordance with the Homelessness Reduction Act) where the duty was ended due to suitable accommodation being secured

Latest commentary on performance:

The homelessness prevention team continues to perform exceptionally well in a challenging external environment and the quarter has seen ongoing high performance which exceeds the target. Effective use of resources coupled with our delivery model of providing specialist advisers to particularly at risk groups such as refugees, victims of domestic abuse and ex-offenders have contributed to high performance and we continue to explore ways to further develop our model.

Over the past three years, average performance has been 78%, demonstrating consistent excellence. In light of this, we have raised the target to 75% which sets a higher standard and enables earlier identification of any dips in performance, helping us maintain our proactive approach to service delivery.

Notes on methodology:

This KPI measures the proportion of households owed a prevention duty whose duty ended due to suitable accommodation being secured for at least six months. This can involve assisting them to stay in their current accommodation or helping them to find a new place to live.
Calculation = $(N / D) * 100$

N = Number of households secured accommodation for at least six months (where a prevention duty ended in the period)

D = Number of households whose prevention duty ended in the period

Breakdown per quarter

KPI Title	Q1 2024/2025	Q2 2024/2025	Q3 2024/2025	Q4 2024/2025	Q1 2025/2026
% of households owed a homelessness prevention duty (in accordance with the Homelessness Reduction Act) where the duty was ended due to suitable accommodation being secured	67.00	75.00	80.00	84.00	82.00

Please note: The target and interventions levels for this KPI were updated in Q1 2025/26. RAG rating prior to this reflect previous thresholds.

Number (of total) (%) of food premises rated 0,1 or 2 (non-broadly compliant), moving to a compliant rating of 3, 4 or 5 against the Food Hygiene Rating System

Q1 2024/2025	Q2 2024/2025	Q3 2024/2025	Q4 2024/2025	Q1 2025/2026
--------------	--------------	--------------	--------------	--------------

Latest commentary on performance:

By June 2025, the team successfully cleared a small backlog of overdue inspections for higher-risk premises. Since then, all such premises have been inspected within the statutory time period, maintaining our commitment to food safety. In April 2025, we reinstated the offer of pre-inspection audits for businesses with a strong track record of good hygiene standards. This initiative has been well received, with increasing uptake from businesses. These audits complement the ongoing food hygiene coaching provided by the team. During 2024/2025, the team conducted a study confirming that hygiene ratings are a reliable indicator of a business's actual hygiene status.

Number of private rented sector homes made safe This is an annual indicator for Q4

Breakdown per quarter

KPI Title	Q4 2024/2025
Number of private rented sector homes made safe This is an annual indicator for Q4	22.00

Q1 2024/2025	Q2 2024/2025	Q3 2024/2025	Q4 2024/2025	Q1 2025/2026
--------------	--------------	--------------	--------------	--------------

Latest commentary on performance:

Last year's performance was significantly boosted by the lifting of prohibition orders on 53 flats in multi-occupied buildings. In contrast, this year saw improvement notices served on 48 premises, affecting 148 units of accommodation—an increase compared to the previous year. While performance in 2024/25 appears lower, it aligns with historical trends; for example, 26 private rented sector homes were made safe in quarter four of 2022. A new service manager has been appointed, with a key priority for quarter one being the review of outstanding notices and the accurate recording of compliance dates. This process will be repeated in the final quarter of 2025/26 to ensure consistency. As part of a broader digitisation programme, the service is transitioning to a unified IT system and is reviewing all outcome codes and performance reports. This aims to better capture successful interventions, including informal actions that result in improvements without the need for formal enforcement

Number of new homes (both council and private) completed (built). This is an annual indicator for Q2

Quarterly Performance

Q1 2024/2025	Q2 2024/2025	Q3 2024/2025	Q4 2024/2025	Q1 2025/2026
--------------	--------------	--------------	--------------	--------------

Latest commentary on performance:

The number of new homes built in the last two years is at a relatively lower rate, but challenges in the housing market are not unique to Norwich, and nutrient neutrality only compounds this issue. The KPI target was set in 2011 when the Joint Core Strategy was adopted. This plan has been replaced in March 2024 by the adoption of the Greater Norwich Local Plan (GNLP). The GNLP annual target for homes is now calculated across the whole of the three districts (Broadland, Norwich and South Norfolk). We are working towards a more robust target to reflect the GNLP plan.

Breakdown per quarter

KPI Title	Q2 2024/2025
Number of new homes (both council and private) completed (built). This is an annual indicator for Q2	246.00

Notes on methodology:

The sum of new homes built in Greater Norwich measured against the annual requirement of the Greater Norwich Local Plan (GNLP)

% household waste sent for reuse, recycling, composting (reporting on previous quarter)

Breakdown per quarter

KPI Title	Q1 2024/2025	Q2 2024/2025	Q3 2024/2025	Q4 2024/2025
% household waste sent for reuse, recycling, composting (reporting on previous quarter)	37.70	41.00	36.00	37.50

Q1 2024/2025

Q2 2024/2025

Q3 2024/2025

Q4 2024/2025

Q1 2025/2026

Latest commentary on performance:

Recycling performance in Quarter 4 has slightly increased, with the status moving from 36% to 37.5%. Rates remain within the typical annual range of 36% to 41%, consistent with historical trends and the seasonal variations which impacts the tonnages of garden waste collected. To enhance recycling outcomes, the following actions are underway:

- Expansion of the Food Waste Service to over 8,000 additional properties in 2026
- Implementation of Simpler Recycling legislation
- Investment in additional Environmental Services resources – Education and Enforcement
- Development of targeted behaviour change campaigns, community education, and enforcement initiatives

Quarter one data is currently unavailable (Blue) due to delays in the Waste Data Flow validation process. Verified data for the Quarter one period 2025-2026 will be published in time for Quarter two, 2025-26 reporting.

Notes on methodology

Using DEFRA methodology from WasteDataFlow. Please note, the KPI for the percentage of household waste sent for reuse, recycling, or composting is reported one quarter in arrears to ensure data accuracy and reliability. This delay allows for thorough validation through Waste Dataflow (WDF), involving automated checks, internal reviews, and audits by Defra and the Environment Agency. The waste system is complex, with over 50 organisations contributing data, including Biffa, NEWS, FCC, and Norfolk County Council. The Council receives validated data from the County Council before submitting it to WDF, but does not control the timing of data delivery.

% reduction of CO2 emissions from Local Authority operations. This is an annual indicator for Q2

Q1 2024/2025	Q2 2024/2025	Q3 2024/2025	Q4 2024/2025	Q1 2025/2026
--------------	--------------	--------------	--------------	--------------

Latest commentary on performance:

The data for the councils next carbon footprint report has been verified and for the 2023/24 financial year, the council's carbon emissions reduced by 8.0% compared to the preceding 2022-23 financial year. This means we comfortably exceeded the 3% target.

Breakdown per quarter

KPI Title	Q3 2024/2025
% reduction of CO2 emissions from Local Authority operations. This is an annual indicator for Q2	8.00

Notes on methodology

The Council's carbon reduction metric relates to the % of carbon dioxide emitted, in tonnes, compared to the previous year. Carbon emissions included in the scope of measurement and reporting include Scope 1, 2 and a subset of Scope 3 emissions (as defined by the International Greenhouse Gas protocol and according to the National Indicator 185). These include heating and fleet fuel for operational buildings* and vehicles, electricity for operational buildings and vehicles, business travel and contractor's emissions for significant contracts including waste and other city services. * Operational buildings include City Hall, Riverside Leisure Centre, The Halls, car parks and sheltered housing schemes.

Average number of days taken to process new Housing Benefit claims from point of receipt to notification of entitlement

Breakdown per quarter:

KPI Title	Q1 2024/2025	Q2 2024/2025	Q3 2024/2025	Q4 2024/2025	Q1 2025/2026
Average number of days taken to process new Housing Benefit claims from point of receipt to notification of entitlement	20.00	15.00	18.00	21.00	22.60

Please note: The target and interventions levels for this KPI were updated in Q1 2025/26. RAG rating prior to this reflect previous thresholds.

Q1 2024/2025

Q2 2024/2025

Q3 2024/2025

Q4 2024/2025

Q1 2025/2026

Latest commentary on performance:

In quarter one, the average Speed of Processing (SoP) for new Housing Benefit (HB) claims was 22.6 days across 351 claims – above the revised target of 21 days. This reflects the increasing complexity of remaining caseloads following the migration of Housing Benefit to Universal Credit. This shift has resulted in more time-intensive casework and increased volumes of data from the Department for Work and Pensions (DWP) relating to HB and Council Tax Reduction claimants. We are also experiencing delays in receiving necessary data from housing providers, which is contributing to longer processing times. Measures will be introduced to address these issues. Nationally, England's average SoP across quarter one to quarter three of fiscal year ending 2025 was 21 days, supporting the rationale for adjusting the local target from 19.5 to 21 days. The service is actively addressing these pressures by focusing team efforts on clearing older new claims to improve performance in coming months.
